

HOW AM I DOING IN THIS CLASS (LETTER GRADE)?

Figuring out your grade in a class can be difficult! Unfortunately, there is no institute-wide policy on grade transparency yet. The best way to figure out how you are doing is by emailing the professor or teaching staff directly, and being specific about inquiries on where you stand:

A-level, near the A-B cutoff, B-level, near the B-C cutoff, etc.

Do the math (according to the grade breakdowns, which are mandatory on syllabi) for each class and make a conscious decision about what exams you will prioritize before you start studying. Tackle the most difficult things first!

Things to Consider:

Exams

How Much does this exam count?

Course Difficulty

Am I doing well? How am I handling the work?

$$M = \left(\frac{x_1 + x_2}{2}, \frac{y_1 + y_2}{2} \right)$$

Relationship with Professor

Do I have a good relationship with them? Do I need a letter of recommendation from them?

Do I even need this class?

Is this a major/minor requirement? Is this a GIR/HASS requirement?
